state

$tx = tx + \text{width}(\text{character})$

Rectangle

Linear transform

$$\begin{bmatrix} a & b & 0 \\ c & d & 0 \\ t_x & t_y & 1 \end{bmatrix}$$

Pesky problems

- missing toUnicode mapping

No way of telling how characters should be mapped from their CIDs!

- ligatures

ligature not represented in unicode

- Diverse interpretations of standards

For example using alignment instead of space character
